Custom Options — Technical Reference & Guide

As a value added service to our customers, 3M Medical Specialties provides custom converting on our tape products to meet customer needs. One service is converting the tape into widths and lengths specific to our customer's requirements. We also can provide slit liner (SL) and/or extended liner (EL) on many of our tape products.

Slit Liner and Extended Liner Capabilities

Extended Liners (EL) — Liner extends past the edge or edges of the adhesive. • Available on all products with a release liner except: **Double-coated Tapes** Single-coated Tapes - any foam tape Left Side - Transfer Adhesives #1524 and #1524A Liner wound on the outside of - Hydrogel Adhesive #9880 Left Side All other products have an EL minimum width of **Extended Line** Liner wound on 1/8" (3mm) and tolerance is +/- 1/16" (+/- 1.5mm) the outside of • Standard maximum roll width is 24" (61cm) Left Side and minimum slit width is 0.5" (1.27cm) Extended Line Extended Line Liner wound on the inside of the roll

NOTE: Please be aware that there may be some restrictions on maximum roll length of any product slit less than 1" (25.4mm) wide due to roll stability during handling.
