

OUR MARKETS

Our Microplate sealing products are produced from stringently selected tapes, coatings, and pressure-sensitive adhesives, including medical and DIAGNOSTIC grade tapes.

The way we design, manufacture, and test these products is driven by the need for 100% QUALITY, integrity, and compliance in the biotechnology, pharmaceutical R&D, and molecular biology fields into which we sell.

PRODUCTS INCLUDE

- Micro Plate seals and laminates for drug discovery and molecular diagnostics
- Evaporation-control films and adhesives for micro/nan fluid storage and mixing
- Optically clear and low-auto fluorescence films with chemical resistant adhesives
- Heat seal and self-adhesive options to suit a wide variety of Micro Plate materials for Polymerase Chain Reaction (PCR) Gas permeable seals, impervious to fluids, for cell, seed, and insect culture
